

AI Lite

You implement Jatana, under our guidance

Preparation: During this phase we'll discuss one (1) use-case and collaborate with your team as they perform the tasks required to successfully configure Jatana.

(1 week)

Training: We will train your project team with an overview of the product and key features, so that you can deploy Jatana smoothly.

(1 week)

Coaching: Provide recommendations and best practices for set-up and configuration over a series of remote calls

Post-Go Live Support: Conduct a final review, address open questions to ensure a smooth launch, and post go-live support.

What you get from AI Lite

Within a 2/3 weeks period, you will have your first AI engine ready & deployed and, within 8 weeks, you will be able to harness and calculate the power of AI.

More importantly, we will train your team so that you can perform automations independently going forward.

Project kickoff

Understand your priorities, review key milestones and timeline for launch

Training

Train your project team with an overview of the product and key functions by role

Coaching

Provide recommendations and best practices for set-up and configuration over a series of remote calls

Go-Live Support

Conduct a final review, address open questions and provide Advocacy support through go-live to ensure a smooth launch

Post-launch subscriptions

The subscriptions are based on the amount of Actions* performed

AI Lite

- Designated Project Consultant
- Remote sessions focused on training and coaching
- Support and best practices
- Configuration review
